

Hanger and Stand-off for Standard Duty Cables

UNITEST

GENERAL

Brand Cimbria
Model Unitest - Hanger CUT2012 and Stand-off CUT2013 for standard duty cables

The Unitest system can be used in all types of grain storage facilities and can be installed in both new and existing installations. The temperature is constantly monitored by means of a number of sensors which are fitted in carrying cables specially designed for installation in harsh environments.

Hanger for suspension of standard duty cables under roof construction; suitable for steel silos and warehouses. The measuring cable is extended and protected by a flexible conduit connected to a junction box in a convenient place on top of the silo.

Stand off for suspension of standard duty cables on top off the roof construction, suitable for concrete and steel silos where rectangular suspension will not fit. The measuring cable is extended and protected by flexible conduit connected to a junction box in a convenient place on top of the silo.

Dimensions

Plate	128 x 80 mm
Strap	340 mm high
Weight	approx. 2 kg
