

Rectangular suspension box F234997

UNITEST

GENERAL

Brand Cimbria
Model Unitest - Rectangular suspension box F234997

The Unitest system can be used in all types of grain storage facilities and can be installed in both new and existing installations. The temperature is constantly monitored by means of a number of sensors which are fitted in carrying cables specially designed for installation in harsh environments.

The Unitest® system includes various installation components which makes it possible to establish any installation for almost all kinds of grain storages.

Hardly two installations are alike and it may be necessary to construct supports, etc. for cables and hangers locally.

Rectangular Suspension Box.

This suspension box is used in concrete silos already built, in steel tanks, and flat storages to suspend a heavy duty cable.

Dimensions

Length	215 mm
Width	150 mm
